EDUCATION

Bachelor of Technology, Chennai Institute of Technology
Artificial Intelligence and Data Science

CGPA- 8.5

PROFESSIONAL SUMMARY

A Motivated Artificial Intelligence and Data Science Undergraduate with a strong foundation in Object-Oriented Programming, Data Structures, and software development. Passionate about building scalable solutions, currently demonstrated through the development of an AI-driven SaaS platform. Skilled in research and data analysis with a record of competitive achievement. Seeking to leverage skills in C++, Python, Data Analysis, and Web Development to solve complex engineering problems.

INTERNSHIP EXPERIENCE

Incoming Summer Intern — 8Queens

Chennai, India | *June 2025 – July 2025*

- Selected for a competitive internship program focused on technology-driven solutions.
 - Preparing to collaborate with engineering teams to support software development and optimize codebases.
-

PROJECTS

AI-Based Educational SaaS Platform

SLM model for health care

Web Scraper for scraping jobs across select websites

Python, Web Technologies | In Progress

- Architecting an AI-powered Software-as-a-Service platform to enhance student learning personalization.
- Developing responsive front-end interfaces using HTML and CSS for accessibility and engagement.
- Implementing algorithms to analyze user interactions and deliver tailored educational content.

Environmental Impact Research: Water Hyacinth Analysis

Data Analysis, Research | Nov 2024 – Dec 2024

- Conducted a detailed ecological study on the “Effect of Water Hyacinths on Water Bodies.”

- Presented a research paper at the SRM University Competition, converting environmental data into actionable insights.
 - Demonstrated interdisciplinary research by correlating biological growth patterns with water quality metrics.
-

TECHNICAL SKILLS

Programming Languages C++,Python	CERTIFICATES Development/Frameworks HTML, CSS Software Development Tools GitHub,Visual Studio Code	Soft Skills Strong Communication, Problem Solving, Interdisciplinary Collaboration, Leadership	Programming Concepts Object-Oriented Programming (OOPs), Data Structures and Algorithms (DSA)
---	---	--	---

ACHIEVEMENTS

- 3rd Place at SDG hackathon conducted in Chennai institute of Technology.
 - Runner-Up, Youth Research Competition: Recognized at SRM University for excellence in research presentation.
 - Coursera Certifications: Completed 2 professional courses (e.g., Python Programming, Data Science).
 - Leadership: Acknowledged for strong teamwork and leadership in academic project groups.
-
